Capitol Campus Update

Roundabout construction project requires tree removal

Eighteen Douglas fir and maple trees will be removed by May 9 as part of the construction of the roundabout that is part of the new data center and office building project under management by the Department of Information Services.

The roundabout under construction is at the intersection of 14th Avenue S.E. and Jefferson Street S.E. Completion of this portion of the overall project is scheduled for mid-November 2010.

A preliminary landscaping plan for the project will be presented at the next meeting of the Capitol Campus Design Advisory Committee on May 27.

DIS maintains a project Web site and regular advisory updates about the project. You can learn more at: <http://dis.wa.gov/construction.aspx>
